Accommodation

Category C-8

Space is a fundamental aspect to any cruiser especially when having families in mind, as such Jeanneau's Merry Fisher 755 has a large open cockpit even when berthed in a marina and having the engine raised. The dynamically designed cabin is bursting with innovation and clever space management and can comfortably accommodate 4 people which is invaluable when at sea.

The Merry Fisher 755 is based on a scandinavian design, 360° view is available from inside the cabin space. This design allows the user to fully experience the outside environment on days where it may be

raining, but still be in the warm comfort of the cabin space.

Remarks :

Jeanneau's Merry Fisher 755 capitalise on space, innovation and attention to details. The Merry Fisher 755 is different in that all aspects from other Merry Fisher Motor boats as she has paved the way to be one of most highly regarded Merry Fishers available today.

Jeanneau's Merry Fisher 755 the most popular boat in the range for a number of reason, and not just detailed French design. As she uses outboard engines standard day to day running costs are lower with recent advances in outboard 4-stroke technology, she uses less fuel and having maintenance work done on her is much easier.

She brilliantly combines fishing capability with family functionality, this is shown in how comfortable you are aboard and can be attributed to Jeanneau's masterful use of space and clever design. Stability is ensured with a traditional V-shaped hull, inside the wheelhouse you'll find her well equipped with a double forward birth and separate WC. Plus a bright open saloon with dinette convertible double berth.

A bright, open space is reinforced with the option of having sliding roof hatch that really opens out the area, this matched with Jeanneau's renown Merry Fisher sliding glass doors has the ability to go from a closed, secure wheelhouse protective of the storm to a bright, open, well-ventilated area within moments.

The Merry Fisher 755 cockpit design is a clever switch up between fishing and relaxing. The cockpit includes a U-shaped seating area which has the option of transforming into a sunbed. All the while this seating area can be stored away to give the maximum amount of pace possibly leaving you free to move around without feeling enclosed as you fish. Fitted with rod holders and storage areas you'll have plenty of places to store your equipment.
