Remarks :

FantaSea is a well-equipped Sealine 360 Statesman, maintained with care and thoughtfully updated. Her twin Volvo Penta KAMD-42P engines, fully serviced in Spring 2023, provide reliable power and performance, while the added generator, solar panels, and inverter enhance her capability for extended cruising. Notable mechanical upgrades, including a new windlass (2021), cutlass bearings (2023), and head gaskets (2020), ensure that critical components are in excellent condition.

The spacious interior, recently recarpeted, offers a modern feel with upgraded cream leather upholstery and diesel warm air heating for comfort in all seasons. **FantaSea** provides flexible accommodation, sleeping up to six with a convertible saloon, well-appointed cabins, and an adaptable galley designed for ease during longer journeys.

The raised helm and flybridge with twin Raymarine plotters give the skipper full command, enhanced by a bow thruster and autopilot for added confidence and control.

With teak-laid decking, davits, and a wide range of deck equipment, **FantaSea** blends style and function for enjoyable days on the water. Her overall maintenance and thoughtful updates make her an attractive and capable choice for discerning buyers.
