The accommodation comprises six berths in 3 cabins, two heads and showers, and one en suite. A large double bed in the forward master cabin offers privacy and space. The high-gloss wood finish is a significant feature of this Flybridge Motor Yacht and a testament to the build quality.

Below the deck, the high-gloss wood lounge is ideal for entertaining. Shore power charges the battery system and powers the boat's 220V outlets. The galley and master bedroom, featuring an en-suite shower and heads, are accessible via the companionway.

A large double bed in the forward master cabin offers privacy and space. This flybridge motor yacht's high-gloss wood finish is a significant feature and a testament to its build quality.

A 600-litre water tank. No grey or black tanks.

Remarks :

The **Guy Couach Flybridge Motor Yacht**, a beautifully crafted 15-meter vessel, is in excellent condition with minimal usage, making it a rare find for yacht enthusiasts. Built with quality craftsmanship and designed for both performance and luxury, this motor yacht seamlessly blends functionality with comfort. It offers an outstanding opportunity for those seeking a reliable and elegant boat for coastal cruising, longer voyages, or simply enjoying life at sea.

Performance and Engineering

At the heart of this vessel lies a powerful propulsion system. Its deep V-planing hull is designed for stability and smooth sailing, even in more challenging conditions. The yacht is equipped with twin Diesel engines, driving high-speed three-blade propellers through a robust shaft system, ensuring exceptional performance on the water. The deep V-hull not only aids in cutting through waves but also provides enhanced speed, stability, and efficiency during cruising, making it ideal for leisurely trips and more exhilarating passages.

The yacht utilizes P-brackets near the rudders for precise manoeuvring, providing optimal control, especially at lower speeds, which can be crucial when docking or navigating through tight spaces. The power trim tabs at the helm enhance stability and comfort, particularly in rough seas, ensuring a smooth and enjoyable ride for the captain and guests. These features make this yacht capable of handling diverse sea conditions quickly and gracefully.

Flybridge and Helm Station

One of the standout features of the **Guy Couach Flybridge Motor Yacht** is its impressive flybridge, which offers 360-degree visibility.. This elevated area provides an exceptional vantage point for navigation and relaxation, making it the ideal place for the captain to steer while giving guests a comfortable space to enjoy panoramic sea views. Equipped with power steering and precise engine controls, the flybridge ensures a seamless handling experience for the captain, making it easy to manoeuvre even in more challenging waters.

Additionally, the flybridge includes a GRP radar arch, which enhances the vessel's navigational capabilities, and a sunshade, which provides much-needed protection from the sun during long days out on the water. This thoughtful design ensures the flybridge is functional and a comfortable and enjoyable space for everyone on board.

Aft Cockpit and Water Access

Safety and ease of access are top priorities on this motor yacht. The spacious aft cockpit is designed with safety in mind, offering a secure environment for passengers while underway or at anchor. This area is perfect for socializing, dining, or relaxing while enjoying the sea breeze. The swim platform at the stern provides easy access to the water, whether you want to swim, snorkel, or launch a tender.

For added convenience, the yacht is equipped with a hydraulic passerelle, which makes boarding and disembarking safe and straightforward, especially when stern mooring in marinas. This hydraulic passerelle also doubles as a practical aid for passengers to safely get in and out of the water, making the yacht even more user-friendly for water-based activities.

Recent Upgrades and Maintenance

The yacht has been meticulously maintained and comes with several key upgrades and recent services. In 2024, the following updates were completed:

- Engine Turbo: The system was upgraded, improving engine efficiency and performance.
- Autopilot: A new autopilot system was installed, making long-distance navigation more accessible and automated.
- Engine Maintenance: Oil and filters were replaced in 2024, ensuring the engines ran at peak performance.

Additionally, the yacht was last removed from the water for routine antifouling in July 2024. During this time, the hull was inspected, cleaned, and treated to prevent fouling, ensuring optimal performance and protection for the boat.

Flag and Location

This stunning yacht carries a Polish flag, which can offer certain registration benefits. It is located in Barcelona, Spain, a vibrant hub for yachting in the Mediterranean. With its prime location, the yacht is ideally situated for easy access to some of the most beautiful cruising grounds in the world, including the Balearic Islands, the French Riviera, and Italy's Tyrrhenian Sea.

Schedule a Viewing

If you want to see this beautiful Guy Couach Flybridge Motor Yacht in person, Network Yacht Brokers can arrange viewings at your convenience.
